

Dear Members of the Admission Committee,

I am pleased to write this reference for (FULL NAME). Being her Physics teacher at the National Physics and Mathematics School for three years, I can assure that (NAME) has an aptitude for exceptional academic performance.

(NAME) came under my instruction in the ninth grade, where she showed herself to be an overachiever. It goes without saying that she receives excellent results on her tests, meets deadlines days in advance, and quickly absorbs the study material. When necessary, she is willing to help other students grasp the material, thus being perceived as a leader among her peers. Moreover, (NAME) is among the most active students in my classes—she eagerly studies material outside of the given curriculum, often staying after class to discuss the unsolved problems of physics.

Notably, she showed her passion for physics during our work on her engineering project, “Investigation of the Mechanics of a Rocket Flight and its Further Appliance”. Her design involved the identification of an optimal configuration for a mini rocket used to monitor the environmental conditions of different regions in Kazakhstan. (NAME) also suggested using a CanSat (microsatellite) to measure the carbon dioxide levels in the air to further improve the quality of the country's environment. Ultimately, this project required not only in-depth knowledge of mechanics and aerostatics, but also of university-level mathematics simplifications, which (NAME) proficiently employed. With this project, she won first place in the city-level Science Projects Olympiad and was the fourth place winner of the 2019 National Science Projects Olympiad.

(NAME)'s in-depth knowledge of the subject allowed me to witness additional victories outside of the classroom. She was the winner of the International Siberian Open Students Physics Olympiad in both 2018 and 2019. Due to her excellent performance in physics, (NAME) was chosen to participate in the “Al-Farabi” Physics Summer Camp, where she was awarded with a Diploma for winning the cumulative competition of the camp. Additionally, she was invited to participate in the 2020 International Siberian Physics Tournament, where she was awarded a Diploma for achieving outstanding results. In the same year, she won third place in the city-level Physics Olympiad.

Based on (NAME)'s high grades, active involvement, and innate curiosity for the natural sciences, I consider her academic performance in my classes to be unparalleled. If her performance under my supervision may serve as an indication of how she would perform as an undergraduate student, (NAME) would undoubtedly be a vital asset to your university.

If you require any additional information, feel free to contact me at the email listed below.

Sincerely,
